Our Blight Resistant Range

Perfect to grow outside anywhere in the UK

Grow with confidence
BLIGHT RESISTANT
Grow with confidence

Blight resistant varieties will still show signs of blight,

but have the natural ability to grow through it, when regular tomatoes would succumb. Plants can still show infection (up to 10-15%) of leaves, stems etc. without affecting fruit quality or yield. The plants have the resistance to be able to grow away from the attack.

Just compare our trial of Crimson Crush with a variety not resistant to blight!
